

PRIVACY POLICY

Select8.ai Platform

Welcome to the Select8.ai Platform and the select8.ai/pl/ website.

We invite you to review our Privacy Policy.

Effective May 25, 2018, Regulation (EU) 2016/679 of the European Parliament and of the Council of April 27, 2016, on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (hereinafter "GDPR") has been in force. Therefore, to assure you of the proper protection of your personal data processed in connection with your use of the Platform, we provide this information to explain how your personal data will be collected and processed, as well as the rights you have in this regard.

The select8.ai/pl/ Platform collects information about users who log in and the actions they take. This information is collected through:

- the contact and login forms, where you provide your data voluntarily;
- contact via email or phone;
- cookies stored on end devices (computers, smartphones, tablets, and other devices that allow access to the Platform);
- the collection of the Administrator's server logs.

I. Information on Personal Data Protection

Who is the Data Controller for personal data on the website select8.ai/pl/?

The controller of your personal data is Select8 Sp. z o.o., with its registered office in Wrocław at ul. Legnicka 57D, apt. B/J, entered in the Register of Entrepreneurs of the National Court Register maintained by the District Court for Wrocław-Fabryczna, 6th Commercial Division of the National Court Register, under KRS number 0001073630, NIP 8943225030, REGON 527076067, with share capital of 50,000 PLN (hereinafter the "Controller").

How can you contact us to obtain more information about the processing of personal data by the Controller?

If you have any questions regarding the processing of your personal data, please contact the Data Protection Officer, Gabriel Kolasa, at the following email address: kontakt@select8.ai

For what purpose and on what legal basis does the Controller process your personal data?

Your personal data is processed for the purpose of handling communications, entering into and performing the Agreement, and providing access to the Platform's content and functionality, including sending and managing requests for proposals and analyzing proposals using artificial intelligence tools. The legal basis for data processing is:

- Article 6(1)(f) of the GDPR, i.e., the necessity to take action at the request of the data subject prior to entering into the Agreement and to perform the Agreement, including the creation and management of an Account, the provision of Services, the administration of the Free Trial Period, Subscriptions, and complaints;
- Article 6(1)(c) of the GDPR, i.e., a legal obligation incumbent upon the Controller, including tax, accounting, and obligations related to issuing invoices in the KSeF system;
- Article 6(1)(f) of the GDPR, i.e., the Controller's legitimate interests, including ensuring the security of the Platform, preventing abuse, monitoring traffic and analyzing the behavior of users and bidders, improving the Platform's operations, quality, and functionality, handling reports regarding content, and pursuing or defending claims;

A detailed description of the purposes and legal bases for processing is also provided in § 25 of the Terms and Conditions for the Provision of Electronic Services (hereinafter "Terms and Conditions").

Is it necessary for you to provide your personal data?

You provide your personal data voluntarily; however, providing the data necessary to handle contact, conclude and perform the Agreement, create an Account, or provide the Services is necessary to achieve these purposes. Failure to provide such data may prevent you from contacting the Company, concluding the Agreement, creating an Account, or using the Platform. Providing data required by law is mandatory to the extent specified by those laws.

Where does the Controller obtain your personal data?

Personal data is primarily collected directly from you, in particular when you contact the Company, verify your needs, place an Order, log in for the first time, and use the Platform. The Controller may also collect data from individuals acting on behalf of the Service Recipient and data from third parties contained in requests for proposals, offers, and attachments submitted via the Platform. If data is collected in a manner other than directly from the data subject, the Controller provides the information required under Article 14 of the GDPR within the timeframes specified in that provision, subject to the exceptions set forth in the GDPR.

To whom may the Controller disclose your personal data?

The Controller may disclose personal data to third parties only to the extent necessary to achieve the purposes set forth in the Privacy Policy. Recipients of the data may include hosting and IT infrastructure providers, providers of artificial intelligence tools and application programming interfaces (APIs), analytics tool providers, payment processors, entities providing accounting or consulting services, email and ticket support providers, and public authorities authorized to receive data pursuant to applicable law.

To the extent that personal data contained in requests for proposals, bids, or attachments is processed on behalf of the Service Recipient, the Service Recipient remains the controller of such data, and the Company processes it as a processor pursuant to Article 28 of the GDPR and the provisions of the Agreement or a separate data processing agreement. Detailed information about the entities entrusted with data processing can be found in the current Privacy Policy or in the list of processors.

Can personal data be transferred outside the European Economic Area?

In connection with the use of services provided by IT infrastructure providers, analytics tools, or artificial intelligence tools, personal data may be transferred outside the European Economic Area if required by the configuration of a given service. Any such transfer is carried out in compliance with the requirements set forth in Articles 44–49 of the GDPR, in particular on the basis of a decision confirming an adequate level of protection or by applying appropriate safeguards, such as the standard data protection clauses adopted by the European Commission. Detailed information about specific transfers, recipients, and the safeguards applied can be found in the Privacy Policy.

How long will the Controller retain your personal data?

Your personal data is retained for the period necessary to fulfill the purposes for which it was collected, in particular for the duration of contact, negotiation, and performance of the Agreement. After the Agreement ends, the data may be retained for the period required by tax and accounting regulations and for the period during which claims may be brought. Data processed on the basis of consent is retained until such consent is withdrawn, unless further retention is based on another legal basis. The specific retention periods for individual categories of data are set forth in the Privacy Policy.

What rights do you have regarding the processing of your personal data by the Data Controller?

You have the right, under the terms set forth in the GDPR, to:

- to access your personal data and obtain information about its processing;
- to request the correction or completion of your data;
- to request the erasure of your data;
- to request restriction of data processing;
- to request the transfer of your data to another entity if the processing is based on Article 6(1)(a) or (b) of the GDPR and is carried out by automated means;
- to object to data processing based on Article 6(1)(f) of the GDPR;
- to withdraw consent at any time, if the basis for processing is consent, without affecting the lawfulness of processing carried out prior to its withdrawal;
- to lodge a complaint with the President of the Personal Data Protection Office.

To exercise these rights, you may contact the Data Controller or the Data Protection Officer as indicated above.

Will your personal data be processed automatically?

The Data Controller may process personal data automatically (including through the use of artificial intelligence tools) to the extent necessary to provide the Services, in particular to analyze bids and bidders' activity in order to assess the effectiveness of sent requests for proposals. The results generated by the Platform are of an auxiliary, educational, or illustrative nature. They do not constitute an independent basis for making decisions regarding the data subject that have legal effects or similarly significantly affect the data subject. In accordance with the Terms of Service, each result should be verified by a person with the appropriate expertise.

II. Cookie Policy

What Are Cookies?

By "cookies," we mean IT data—specifically text files—that are stored on the User's device, such as a computer, phone, or tablet, and are intended for use with the Administrator's websites, including select8.ai/pl/. Cookies typically contain the name of the website they come from, their storage duration on the end device, a unique number generated by the browser, and other necessary information.

What types of cookies may be stored?

Two main types of cookies may be used on the Platform's website: "session" cookies and "persistent" cookies.

"Session" cookies are temporary files that are stored on the User's device until the User logs out, leaves the website, or closes the browser.

"Persistent" cookies are stored on the User's device for the duration specified in the cookie's settings or until the User deletes them.

What are the purposes of using cookies?

Cookies may be used to:

- ensuring security while using the Platform;
- maintaining the User's session after logging in, so that the User does not have to re-enter their username and password;
- ensuring the proper functioning of the Platform;
- using data for analytical and statistical purposes, provided the User has given the required consent.

Can you control the storage of cookies, and if so, how?

Essential cookies may be used to the extent necessary for the proper functioning of the Platform and the provision of the Service requested by the User. In the case of cookies that are not

essential for providing such a Service, the Administrator obtains the User's consent if it is required under applicable law, in particular Article 399 of the Act of July 12, 2024—Electronic Communications Law.

You can manage cookies through your browser settings and, if the Platform provides such a feature, through the consent settings panel. Web browsers also allow you to delete cookies. Blocking certain cookies may affect the operation of selected Platform features.

Detailed information about the cookies used, their names, providers, purposes, and retention periods can be found in the cookie settings available on the Platform and in the Privacy Policy.

III. Collection of Server Logs

Information about certain activities performed on the Platform is recorded in the form of logs on the Administrator's server. This data is used to administer the service, ensure security, detect abuse, and ensure the proper functioning of the Platform.

In addition to the IP address and the URL of the viewed resources, information may also be recorded regarding:

- the time the request was received;
- the time the response was sent;
- the client's hostname, as determined by the HTTP protocol;
- errors that occurred during the execution of the HTTP transaction;
- the URL of the page visited before accessing the Platform's website, if the transition occurred via a link contained on that page;
- information about the browser being used;
- information about the IP address assigned to the device.

The IP address and other information contained in the logs may, under certain circumstances, constitute personal data. The Administrator uses this information to the extent necessary to administer the server, ensure the security of the Platform, and defend against unauthorized access.

IV. Use of Artificial Intelligence Tools

For what purpose does the Platform use artificial intelligence tools?

Selected features of the Platform use artificial intelligence algorithms, including generative models and machine learning. These tools may support the submission and management of requests for proposals and the analysis of proposals. Data and content transmitted via the Platform may be used by the Company to improve the Platform's operations, quality, security,

and functionality, including the development and improvement of the Services and artificial intelligence tools.

How can artificial intelligence tools process data?

Content uploaded to the Platform may be processed using AI tools and transmitted to third-party providers of artificial intelligence models, in particular to providers such as OpenAI, via an application programming interface (API). Data and content provided by Users may be used by the Company to improve the Platform's operations, quality, security, and functionality, including the development and improvement of the Services and AI tools. The scope of the content transmitted, the location of its processing, the retention period, and the rules governing the use of this content by the Company and third-party providers are specified in the current list of providers, the Privacy Policy, and the relevant provisions regarding the processing of personal data.

What data may be processed by artificial intelligence tools?

The system may process information contained in requests for proposals, proposals, and attachments submitted via the Platform. Pursuant to § 20 of the Terms of Service, the Service Recipient agrees not to enter into the AI tools any data of an unlawful or confidential nature—including trade secrets of third parties—or special categories of personal data (sensitive data), unless a specific feature explicitly provides for such use.

If the submitted content contains personal data, its processing is carried out in accordance with the provisions of the GDPR. With respect to data entrusted by the Service Recipient, the Company processes it in accordance with the rules set forth in Article 28 of the GDPR and the provisions of the Agreement or a separate data processing agreement.

Results generated by AI tools may be false, inaccurate, incomplete, or misleading. They are intended for auxiliary, educational, or illustrative purposes and require human verification before being used in business or operational activities. The rules for using AI tools and the Service Recipient's liability are set forth in § 20 of the Terms of Service.

Final Provisions

This Privacy Policy is effective as of September 24, 2026.

In matters not covered by this Privacy Policy, the provisions of the GDPR, the Act of May 10, 2018, on the Protection of Personal Data, the Act of July 12, 2024—Electronic Communications Law, and the Terms of Service shall apply.
